

THE ENAGIC

emGuarde GO

PORTABLE HARMONIC SUPPORT
FOR YOUR EVERYDAY ENVIRONMENT

INVISIBLE SUPPORT. MODERN FREEDOM.

COMPACT | USB-C | UP TO 72 HOURS

CHANGE YOUR ENVIRONMENT. CHANGE YOUR LIFE.

THE ALL-NEW PORTABLE SYSTEM

MEET EMGUARDE GO

YOUR CLOSE-BODY PERSONAL HARMONIC SUPPORT DEVICE

Designed for continuous everyday use in environments filled with modern electronics. emGuarde GO combines Enagic's patented harmonic technology with a compact form, USB-C charging, and portability that lets it move with you.

PORTABLE

Take it wherever you go

STUDIED

Supported by human-intervention research

CONSISTENT

Designed for close-body use

PATENTED

Harmonic technology

LONG-LASTING

Up to 72 hours per charge

DESIGNED TO MOVE WITH YOU

01 CLOSE-BODY FORMAT

Slim, lightweight form designed for daily portability.

02 USB-C CHARGING

A modern charging connection for home, office, and travel.

03 UP TO 72 HOURS

Long-lasting lithium battery performance under normal use.

04 PATENTED TECHNOLOGY

Harmonic technology designed to support a more balanced personal environment.

IMPORTANT

emGuarde GO is a wellness and environmental-support product. It is not a medical device and is not intended to diagnose, treat, cure, or prevent disease.

DIFFERENT TYPES OF POLLUTIONS

- Water Pollution
- Air Pollution
- Noise Pollution
- Electromagnetic Radiation (EMR) Pollution

EMR pollution, unlike other environmental threats, is invisible—you can't see, smell, hear, or taste it. Yet, it's all around us, constantly bombarding our bodies and affecting our well-being in ways we might not realise.

What is Electromagnetic Radiation?

EMR is a type of energy that travels through space and matter. It includes familiar forms like light, heat, and radio waves. Think of EMR as energy that moves incredibly fast, at the speed of light—about 300,000 km/second—radiating like ripples spreading out in water.

EMR has different properties, such as wavelength (the distance between wave peaks), frequency (how often the waves pass a point), and energy.

EARTH POLLUTION

water pollution

air pollution

noise pollution

WHERE DOES EMR COME FROM?

EMR comes from several sources. For instance, when particles like electrons are moved quickly, they produce EMR.

EMR is all around us, it can come from both natural and man-made sources.

The electromagnetic (EM) spectrum shows up in everyday life in different ways:

- Radio Waves: Your radio picks these up from stations, and they're also emitted by stars and space gases.
- Microwaves: Used to cook food quickly and help astronomers study nearby galaxies.
- Infrared: Night vision goggles detect heat from objects, and in space, infrared helps map dust between stars.
- Visible Light: Detected by our eyes; emitted by fireflies, light bulbs, and stars.
- Ultraviolet (UV): Emitted by the Sun, causing tans and sunburns.
- X-rays: Used for dental imaging and airport security; hot gases in space also emit X-rays.
- Gamma Rays: Used in medical imaging, and the universe itself is a massive source of gamma rays.

ELECTROMAGNETIC SPECTRUM

The electromagnetic spectrum is divided into two -
Ionizing & Non-Ionizing Radiation:

- **Ionizing Radiation** (depicted in red) includes radiation that has enough energy to ionize atoms or molecules, which can potentially cause damage to living tissues. Examples include X-rays and gamma rays.
- **Non-Ionizing Radiation** (on the left) has lower energy and does not ionize atoms or molecules. It includes types of radiation such as radio waves, microwaves, infrared, and visible light.

3 Types of Electromagnetic Energy

1. Electromagnetic Field Energy

The electric field and magnetic field generated by AC power sources

2. Signal Transmission Energy

Radiation generated from signal transmission devices (devices with antennae) i.e. wi-fi router or your mobile phone

3. Electromagnetic Noise Energy

Unwanted radiation or by-product form Electromagnetic field and signal transmission (most dangerous).

emGuarde has been designed and built to suppress targeted electromagnetic noise radiation (by-product from electromagnetic field and signal transmission) within the frequency range of 3 MHz to 1000 MHz

SOURCES OF ELECTROMAGNETIC NOISE RADIATION

- Sockets
- Electrical Cables
- Aircon
- Microwave
- Wifi
- Phones
- Tablets
- Computers
- TV
- Appliances

You can't escape the electromagnetic disturbances around you, but with emGuarde, you get cutting-edge protection from electromagnetic noise radiation 24/7.

It's a smarter way to safeguard your family from invisible electromagnetic interference.

HOW EMGUARDE GO WORKS

01

HARMONIC PATTERN

The system is designed around patented harmonic characteristics.

02

PERSONAL ENVIRONMENT

Its portable format supports consistent use around the body as you move.

03

EVERYDAY ELECTRONICS

Built for modern environments where phones, Wi-Fi, computers, and other devices are present.

HOW FREQUENCIES IMPACT YOUR BODY

According to the new FCC exposure limits, the human body absorbs RF energy more effectively at certain frequencies, with the strictest regulations applied in the range of 30 MHz to 300 MHz.

AGGREGATE FREQUENCIES OF BODY ORGANS

¹AWADHESH KUMAR MAURYA, ²AMIT SHARMA

Abstract - In this study, we explored the possibility of an Average frequency of human body organs. We determine the average frequencies between two organs by Matlab Simulation. Every cell, every tissue, and organs have it's own frequency.

S. No	Frequency Table of Body Organs	
	Name of Body Organs	Frequency(In MHz)
1	Brain Frequency	72-90
2	Normal Brain Frequency	72
3	Human Body	62-78
4	Heart Frequency	67-70
5	Liver Frequency	55-60
6	Pancreas Frequency	60-80
7	Disease Start at	58

Fig.1: Frequency Range of Body Organs[13]

the frequency of another person's blood frequency in this many parameters are exists i.e. structure of blood, red blood cell pattern etc. Then the transplantation of

0	pancreas frequency	60-80
7	Disease Start at	58

Fig.1: Frequency Range of Body Organs[13]

CO-FREQUENCY RESONANCE

What happens during resonance?

If the frequency matches the object's resonant frequency, you will get what is called resonance.

Resonance happens when the frequency of the oscillations of an object is raised by another object's corresponding vibrations.

PRESS RELEASE
N° 208

31 May 2011

IARC CLASSIFIES RADIOFREQUENCY ELECTROMAGNETIC FIELDS AS POSSIBLY CARCINOGENIC TO HUMANS

Lyon, France, May 31, 2011 -- The WHO/International Agency for Research on Cancer (IARC) has classified radiofrequency electromagnetic fields as **possibly carcinogenic to humans (Group 2B)**, based on an increased risk for **glioma**, a malignant type of brain cancer¹, associated with wireless phone use.

FREQUENCY AND HARMONIC SUPPORT

3 MHz - 1000 MHz

EMD-100 environmental interpretation range

The EMD-100 evaluates environmental electromagnetic activity within this range and translates it into the Ambient Electromog Index (AEI). It is an interpretation tool - not a medical or regulatory meter.

WHAT THIS MEANS

- Different environments can produce different readings.
- Distance, nearby electronics, building materials, and positioning can affect results.
- The harmonic indicator supports before-and-after environmental comparison.
- Use consistent positioning and repeatable conditions when testing.

RESPONSIBLE INTERPRETATION

The EMD-100 and emGuarde GO are intended for environmental observation and wellness support. A lower or higher reading does not by itself establish that an area is medically safe or unsafe.

THE UTAR 3-DAY HUMAN STUDY

REAL PEOPLE. MEASURABLE BIOMARKERS.

The supplied Universiti Tunku Abdul Rahman (UTAR) study summary reports biological and participant changes measured across a three-day human intervention involving emGuarde use.

Study window: 3 days

01 HUMAN INTERVENTION

Participants were evaluated before and after the study period.

02 MULTIPLE ENDPOINTS

The summary includes blood-cell aggregation, EHS-related symptoms, serotonin, and HSP-27.

03 SHORT-TERM FINDINGS

The results describe this specific study period and should not be generalized beyond its design.

REPORTED RESULTS AFTER 3 DAYS

50.7%

REDUCTION

in blood-cell aggregation

70.3%

IMPROVEMENT

among users with EHS in the
supplied summary

59.5%

INCREASE

in serotonin levels

42.5%

REDUCTION

in heat-shock protein HSP-27

IMPORTANT CONTEXT

These figures reproduce the supplied UTAR study summary. They do not establish that emGuarde GO diagnoses, treats, cures, or prevents any condition. Consult the complete study and a qualified health professional for interpretation.

EVERYDAY PORTABILITY

POWERED FOR LIFE ON THE GO

UP TO

72 HOURS

per charge under normal use

USB-C

Modern, convenient charging

BUILT FOR YOUR ROUTINE

Charge it, take it with you, and keep it close during work, travel, exercise, and everyday life. Actual battery performance varies with operating conditions and charging habits.

DESIGNED FOR MOVEMENT

YOUR PERSONAL ENVIRONMENT

HOME

Stay consistent around everyday electronics.

WORK

A compact companion for office environments.

TRAVEL

Portable support that moves with you.

ACTIVE LIFE

Designed to remain close throughout your day.

LIVE IN HARMONY. MOVE WITH CONFIDENCE.

Use the device according to official Enagic guidance.

MEET THE EMD-100

AMBIENT ELECTROSMOG INDEX (AEI)

The EMD-100 interprets environmental electromagnetic activity and presents it as a simple visual index.

0-25

LOW

26-50

MODERATE

51-75

ELEVATED

76-100

HIGH

WHAT IT DOES - AND DOES NOT DO

The EMD-100 supports environmental comparison and harmonic-indicator observation. It does not diagnose health risks, determine medical safety, or report precise regulatory field-strength units.

A CONSISTENT TESTING ROUTINE

1

INSTALL BATTERIES

Insert 3 x AA 1.5V batteries with the correct polarity.

2

POWER ON

Press the power button once and allow the display to stabilize.

3

HOLD NATURALLY

Use the detector as a handheld measurement device.

4

COMPARE CONDITIONS

Keep distance, height, positioning, and nearby devices consistent.

5

WATCH THE HARMONIC INDICATOR

Green indicates interaction interpreted as more harmonized; red indicates less harmonized.

READ THE ENVIRONMENT RESPONSIBLY

MEASUREMENT

- Use handheld positioning
- Repeat under similar conditions
- Expect local variation
- Avoid treating one reading as universal

INTERPRETATION

- AEI is a relative index
- Green does not prove medical safety
- Red does not prove medical danger
- Results vary with distance and surroundings

COMPLIANCE

- CE
- FCC
- RoHS
- CB Certificate
- SGS-CSTC documentation

REMEMBER

The detector measures conditions at its current location. Readings can change with surrounding electronics, structures, vehicles, power sources, weather, and movement.

8-POINT GLOBAL PATENTED SYSTEM

HOW IT WORKS

Enagic allocates a marketing pre-budget of 8 points when an emGuarde GO is sold. Each point is distributed at US\$150 through the patented 8-point structure.

1A = 1 POINT

US\$150 / POINT

emGuarde GO = US\$1,200 PRE-BUDGET

US\$2,880 + TAX (U.S. REFERENCE)

Pricing, taxes, and availability vary by market.

RESOURCES AND RESPONSIBLE USE
